Portfolio Manager Challenge...Staying on Top

October 2014

Since March 9, 2009, the Standard & Poor's 500 Index has expanded 192 percent through September 30, 2014. In an environment where the Federal Reserve has promoted ownership of stocks, irrespective to quality, the majority of portfolio managers have trailed their respective index targets. For the five-year period ending September 30, 2014, the S&P 500 index returned 15.7% per year and ranked in the top 12th percentile of the Morningstar large-cap blend universe – that is, beating 88% of the universe of products. Naturally, this has encouraged investors to embrace index funds. Of course, that also means accepting the volatility and risk of a defined market.

According to the Wall Street Journal¹, of the top-rated mutual funds from 10 years ago (2004), having five-star ratings from Morningstar Inc., many have dropped to four stars, three stars or worse. Among the fund products with five-star ratings, 37% had lost one star 10 years later, 31% lost two stars, 14% dropped three stars, and 3% lost four. That works out to 85% of the peer group got worse. Only 58 funds out of the original 403 funds carried the same five-star rating through July 2014.

Separately, Professors Christopher Blake of Fordham University and Professor Matthew Morey of Pace University analyzed the predictive powers of Morningstar ratings and found several conclusions.

1. Morningstar ratings, at best, do only slightly better than alternative predictors in predicting product performance.
2. There is weak statistical evidence that five-star rated products outperform the four and three-star funds.
3. Morningstar was able to predict low-performing funds below three stars, which generally have much worse future performance than other groups.

BCA has found a similar paradox when reviewing investment managers having top quartile five-year performance. It has been shown that sequential five-year performance samples reveal a new set of top performers. And managers that were narrowly below the median for a five-year period were more likely to end up above in the next five-year period.

Investment Summary
September 30, 2014

- For the quarter, the Fund had a market based investment loss of \$1.1 million or -0.9% (-1.1% net), trailing the benchmark (-0.7%). The Board of Trustees resolved to replace C.S. McKee with Vulcan Partners and the agreement is pending adoption. The three best performing asset categories were: Cornerstone private RE (+3.2%), Westwood MLPs (+1.6%), and the passive iShares Russell large-cap growth ETF (+1.5%).
- Fiscal year to-date, the Fund earned \$3.9 million or +6.1% (+5.6% net), ahead of the benchmark (+4.7%). The three best performing asset categories were: Westwood MLPs (+22.0%), RREEF REIT (+15.0%), and SSI convertibles (+8.2%).
- For the 12-month period, the Fund earned \$7.3 million or +11.2% (+10.5% net); beating the benchmark (+9.0%), and ranked in the top 21st percentile. The three best performing asset categories were: Westwood MLPs (+30.7%), passive iShares Russell large-cap growth ETF (+19.0%), and CS McKee large-cap value (+17.5%).
- **For the three-year period, the Fund earned \$21.8 million or +13.1% (+12.4% net), per year – ranking in the top 47th percentile.**
- **For the five-year period, the Fund earned \$27.0 million or +10.3% (+9.7% net) per year, well above ahead of the actuarial assumed rate of return (+8.0%). Results ranked in the 52nd percentile.**
- The Scout mid-cap separately managed portfolio (\$7,961,463) was funded on 7/18/14 from the iShares S&P MC ETF sale proceeds.
- The final funding deficiency payment of \$3,648,000 plus \$50,000 from ETF income was invested on 10/1/14 as follows: \$300K LCG; \$400K MC; \$800K MLPs; \$858K FI; \$500K TIPS; and \$840K Hedge Funds.

Investment Summary (Continued)
September 30, 2014

Product/Manager Reviews:

- The passive Russell 1000 Growth ETF product continues to be an excellent performer, ranking in the top 29th percentile for the five-year period.
- The passive S&P 400 ETF was replaced by the Scout mid-cap portfolio on 7/18/14.
- The Westwood MLP product had a strong 12-month performance – well ahead of its benchmark (+30.7% vs. +24.4%).
- Advent and SSI's convertible bonds three-year results trailed the benchmark, but ranked in the top 48th and 27th percentiles, respectively.
- Fisher's international product beat its benchmark for the three and five-year periods.
- RREEF REIT was in-line with its benchmark for the three and five-year periods, and rank above the IPS objective.
- Cornerstone's private real estate program was an excellent bond substitute for the 12-month period, earning +10.1%.
- Galliard's core fixed-income program has been a consistent performer, with results ahead of the benchmark and ranked average for the three and five-year periods.
- The Galliard's TIPs continue to closely track the benchmark.
- The Intercontinental hedge fund beat its benchmark for the three-year period (+10.1% vs. +8.0%).

EQUITY INVESTMENT PHILOSOPHY - The investment philosophy of the Scout Mid Cap Equity strategy since is that superior long-term, risk-adjusted relative performance can be achieved through a portfolio of attractively-valued, quality companies that are expected to benefit from company-specific or macroeconomic catalysts. To accomplish this, the management team incorporates a combination of top-down and bottom-up analysis to construct a diversified portfolio of 50-100 securities with attractive fundamentals and valuations. They invest primarily in mid cap companies with a market cap range between \$1.5 and \$17 billion, a range that approximates the market capitalization of the strategy's benchmark, the Russell Midcap Index. The management style is categorized as "mid cap core." The Strategy's investment philosophy has not changed since its inception on 12/31/2006.

INVESTMENT DECISION-MAKING PROCESS - The Scout Mid Cap Equity portfolio management team combines focused bottom-up analysis with a detailed top-down overlay of economic and sentiment indicators. A disciplined bottom-up fundamental research process is conducted on companies that are likely to benefit from prevailing sector or industry themes, with particular attention paid to cash flow, financial strength, profitability, potential or actual catalysts, valuation measures and management quality. The top-down approach monitors over 100 proprietary economic and sentiment indicators on a weekly basis in order to assess the investment climate. This data is supplemented by analysis from Scout's own research department, outside research services, and news to generate secular investment themes that guide sector allocations and choice of preferred industries. Quantitative screens may be used as an additional resource in the idea generation process. When evaluating an individual security, the team begins with a critical analysis of a company's financial statements, continues with the determination of its intrinsic value, uncovers the catalyst for appreciation, and finally assesses company specific risk. 1) They begin with an evaluation of the company's cash flow statement, as the team believe that it is one of the more useful financial statements. This evaluation aids in the determination of the company's true profitability as well as their sources of growth, either organic growth or growth generated by strategic acquisitions. Consistency, growth rates, and sources of cash flow are examined, with special attention paid to the presence or absence of free cash flow. This step also serves as a first check on accounting quality, as the ratio of operating cash flow to net income can be measured, and the frequency of one time charges can be observed. Companies with poor cash flow characteristics are usually rejected. 2) The balance sheet is examined in light of the cash flow

statement, as they believe that strong cash flows support the balance sheet. Companies with leverage greater than five times debt-to-cash flow or poor interest coverage ratios are usually rejected. In addition to the degree of leverage, the team considers other factors including the term structure of debt, liquidity events, and debt covenants. 3) An analysis of the income statement is completed, with particular attention paid to the history of operating margins, as they prefer companies with a ten year history. From this analysis, the team estimates normalized earnings for use in the proprietary valuation model. They usually reject companies with deteriorating operating margins, unless they are convinced the downturn is temporary. 4) To determine a company's intrinsic value, the team utilizes a proprietary discounted earnings model with customized inputs. These inputs include the normalized earnings calculated from the analysis of the income statement, proprietary discount rates, and the estimated growth potential of the company. In addition, the model is adjusted for the company's industry and risk-adjusted for cyclicality. The valuation model is a powerful tool in measuring a security's upside potential. 5) Relative valuation is also important to the valuation process and is particularly useful for the assessment of downside risk. Price-to-book, price-to-earnings, and enterprise value are the most common relative valuation measures used. 6) Following the valuation analysis, the team uncovers a company's catalyst for appreciation. Catalysts may be company-specific or top-down in nature, and may include a change in management, new market, or technology change. 7) Company-specific risk evaluation includes several factors, one of which is accounting quality. A review of revenue recognition and accounting policies is conducted to determine possible earnings volatility. 8) Management quality is also an important variable in a company's success. The review includes the management team's experience, accomplishments, success in product innovation, and their incentive structures. 9) Other risk factors the team examines are litigation risks, insider trading, short interest, and technical analysis. 10) Portfolio sector weights are influenced and adjusted as shifts occur in valuation, themes, and fundamentals. In addition, they normally keep forward looking ex-ante tracking error in the 3.0 to 8.0 range.

ORGANIZATION AND OWNERSHIP - Scout Investments, Inc., headquartered in Kansas City, Mo., manages equity and fixed income strategies for institutional clients and individual investors through our Scout and Reams Asset Management divisions. Scout Investments is a wholly owned subsidiary of UMB Financial, a multi-billion dollar diversified financial services company with roots tracing back to 1913. UMB Financial Corp. developed mutual fund solutions for customers with the inception of the Scout Stock Fund and the Scout Bond Fund in 1982 and the Scout International Fund in 1993. In 2001, Scout Investment Advisors, then a subsidiary of UMB Bank, registered with the SEC as an investment advisor, for the purpose of managing the Scout Funds. In 2009, Scout Investment Advisors transitioned from UMB Bank and became a subsidiary of UMB

SCOUT INVESTMENTS SCOUT MID CAP EQUITY

Financial Corp. In 2010, Scout Investment Advisors expanded its focus to include multiple fixed income solutions through the acquisition of Reams Asset Management Company. With this acquisition, Scout Investment Advisors was renamed Scout Investments. Since its inception in 1981, Reams has focused on the management of core plus fixed income portfolios for institutional clients. At the request of Reams' clients, Reams added the core fixed income product in 1992, intermediate in 1989, high yield/absolute return in 1998, low duration and long duration in 2002, and a TIPS-only mandate in 2004. Today, Scout Investments offers a wide array of equity and fixed income solutions through mutual funds and separate accounts. The firm's expertise with international equity and fixed income income has been nationally recognized and is the cornerstone of its value proposition. The following companies have a relationship with Scout that is material to our advisory business: UMB Financial Corporation; Scout Distributors, LLC; Scout Funds; the Columbus Extended Market Fund, LLC; UMB Bank, n.a.; UMB Fund Services, Inc.; UMB Distribution Services, LLC; and Prairie Capital Management, LLC.

Palm Tran, Inc./ATU Local 1577 Pension Fund Glossary of Terms

- ACCRUED INTEREST- Bond interest earned since the last interest payment, but not yet received.
- ALPHA- A linear regressive constant that measures expected return independent of Beta.
- ASSET ALLOCATION- The division of portfolio asset classes in order to achieve an expected investment objective.
- BALANCED UNIVERSES - BNY Mellon Public Funds, Endowments & Foundations, Corporate peer groups, and PSN peer groups.
- BETA- A measure of portfolio sensitivity (volatility) in relation to the market, based upon past experience.
- BOND DURATION- A measure of portfolio sensitivity to interest rate risk.
- COMMINGLED FUND- An investment fund which is similar to a mutual fund in that investors are permitted to purchase and redeem units that represent ownership in a pool of securities.
- CONVERTIBLE BONDS - Hybrid securities' that offer equity returns during rising equity markets and improved down-market protection.
- CORE- An equal weighting in both growth and value stocks.
- CORRELATION COEFFICIENT- A measure of how two assets move together. The measure is bounded by +1 and -1; +1 means that the two assets move together positively, while a measure of -1 means that the assets are perfectly negatively correlated.
- GROWTH MANAGER- Generally invests in companies that have either experienced above-average growth rates and/or are expected to experience above-average growth rates in the future. Growth portfolios tend to have high price/earnings ratios and generally pay little to no dividends.
- INDEXES- Indexes are used as "independent representations of markets" (e.g., S&P 500).
- INFORMATION RATIO- Annualized excess return above the benchmark relative to the annualized tracking error.
- LARGE CAP- Generally, the term refers to a company that has a market capitalization that exceeds \$10 billion.
- MANAGER UNIVERSE- A collection of quarterly investment returns from various investment management firms that may be subdivided by style (e.g. growth, value, core).
- MID CAP- Generally, the term refers to a company that has a market capitalization between \$2 and \$10 billion.
- NCREIF - A quarterly time series composite total rate of return measure of investment performance of a large pool of individual commercial real estate properties acquired in the private market for investment purposes only.
- NCREIF ODCE - Open End Diversified Core Equity index which consists of historical and current returns from 26 open-end commingled funds pursuing core strategy. This index is capitalization weighted, time weighted and gross of fees.

Palm Tran, Inc./ATU Local 1577 Pension Fund

Glossary of Terms

-NET- Investment return accounts only for manager fees.

-PROTECTING FLORIDA INVESTMENT ACT (PFIA) - SBA publishes a list of prohibited investments (scrutinized companies).

-RATE OF RETURN- The percentage change in the value of an investment in a portfolio over a specified time period, excluding contributions.

-RISK MEASURES- Measures of the investment risk level, including beta, credit, duration, standard deviation, and others that are based on current and historical data.

-R-SQUARED- Measures how closely portfolio returns and those of the market are correlated, or how much variation in the portfolio returns may be explained by the market. An R2 of 40 means that 40% of the variation in a fund's price changes could be attributed to changes in the market index over the time period.

-SHARPE RATIO- The ratio of the rate of return earned above the risk-free rate to the standard deviation of the portfolio. It measures the number of units of return per unit of risk.

-SMALL CAP- Generally refers to a company with a market capitalization \$300 million to \$2 billion.

-STANDARD DEVIATION- Measure of the variability (dispersion) of historical returns around the mean. It measures how much exposure to volatility was experienced by the implementation of an investment strategy.

-SYSTEMATIC RISK- Measured by beta, it is the risk that cannot be diversified away (market risk).

- TIME WEIGHTED (TW) RETURN - A measure of the investments versus the investor. When there are no flows the TW & DOLLAR weighted (DW) returns are the same and vice versa.

-TRACKING ERROR- A measure of how closely a manager's performance tracks an index; it is the annualized standard deviation of the differences between the quarterly returns for the manager and the benchmark.

-TREYNOR RATIO- A measure of reward per unit of risk. (excess return divided by beta)

-UP AND DOWN-MARKET CAPTURE RATIO- Ratio that illustrates how a manager performed relative to the market during rising and declining market periods.

-VALUE MANAGER- Generally invests in companies that have low price-to-earnings and price-to-book ratios and/or above-average dividend yields.

Advisory services are offered through or by Burgess Chambers and Associates, Inc., a registered SEC investment advisor.

Performance Reporting:

- 1.Changes in portfolio valuations due to capital gains or losses, dividends, interest, income and management fees are included in the calculation of returns. All calculations are made in accordance with generally accepted industry standards.
- 2.Transaction costs, such as commissions, are included in the purchase cost or deducted from the proceeds or sale of a security. Differences in transaction costs may affect comparisons.
- 3.Individual client returns may vary due to a variety of factors, including differences in investment objectives, asset allocating and timing of investment decisions.
- 4.BCA does not have discretion or decision making authority over any investments. All decisions regarding investment manager selection and retention, asset allocation, and other investment policies were made by the client. While BCA provides recommendations and choices regarding suitable investments, not all clients take these recommendations or select from the choices offered.
- 5.Performance reports are generated from information supplied by the client, custodian, and/or investment managers. BCA relies upon the accuracy of this data when preparing reports.
- 6.The market indexes do not include transaction costs, and an investment in a product similar to the index would have lower performance dependent upon costs, fees, dividend reinvestments, and timing. Benchmarks and indexes are for comparison purposes only, and there is no assurance or guarantee that such performance will be achieved.
- 7.Performance information prepared by third party sources may differ from that shown by BCA. These differences may be due to different methods of analysis, different time periods being evaluated, different pricing sources for securities, treatment of accrued income, treatment of cash, and different accounting procedures.
- 8.Certain valuations, such as alternative assets, ETF, and mutual funds, are prepared based on information from third party sources, the accuracy of such information cannot be guaranteed by BCA. Such data may include estimates and maybe subject to revision.
- 9.BCA has not reviewed the risks of individual security holdings.
- 10.BCA investment reports are not indicative of future results.
